

A/V AND STAGE REQUIREMENTS

I. LIGHTING

- Since Greg is regularly interacting with his audience, it works best if you leave the full house lights on during the program. If your event, however, is in a theater setting, then a spotlight would be preferable.

II. AUDIO

- For Greg's presentation, please provide a LAVALIER (LAPEL) MIC).
- Good sound is crucial to the success of your program. If your sound system and microphone are not adequate, please borrow or rent quality equipment. Greg does have his own lapel mic that could be plugged into your sound system, but prefers to not travel with it unless absolutely necessary. Please check these requirements with your sound tech or feel free to have the sound tech call Greg for further assistance.

III. STAGE

- The stage riser set up should be elevated at least two feet high. The larger the better, with a MINIMUM dimension of 8' x 12'.
- Plus, one flat wood (backless) stool on stage. Greg provides his own for local shows.

IV. RECORDING POLICY

- Audio/video taping of Greg's presentation is not allowed without written permission. Greg retains all commercial rights to video. Thank you for complying with this request.
